

"Stuart and Unistruct were great. Very professional.

We live on a very steep site and had major structural issues with our double garage, which rendered it unsafe to use.

We searched around for various quotes for structural and remediation work to the garage. The work required was extensive and difficult.

Unistruct had the best price, was the most professional, and presented a proper quote. Stuart went through the entire job with me, explained it all, including the insurances, contract, and everything.

They finished the job super quick and we are super happy with it. The garage is now a safe and sound area that we use constantly.

I have no hesitation at all in recommending Stuart and Unistruct Building.

Thank you- sam"
